

CE-1500EX

Keeping Australia clean

Advanced Secondary Wastewater Treatment System

Hydraulic loading - 1500L / day (10ep)

FEATURES

Reliable High Performance

Although the **CE-1500EX** is one of our standard models and is small and compact, its performance is extremely efficient and reliable.

CE-1500EX has a Peak-cut System which can effectively cope with shock loadings. The water level in the system varies according to the presence of any inflow or not.

Proven Design

With 45 years experience, Fuji Clean Co. Ltd. is the leading manufacturer of high efficiency wastewater systems in Japan, manufacturing and installing in excess of 40,000 units per annum.

Easy Maintenance

The "Contact Filter bed process" is the unique treatment method developed by Fuji Clean.

The aeration pipes can be cleaned by inserting a brush, resulting in easier maintenance of the unit.

Lower Operational Costs

The Air Blower used in the **CE-1500EX** is the most energy efficient in its class. It uses just 54 watts compared to 80 watts of other blowers. This results in much lower ongoing operational costs and makes the unit more environmentally friendly.

Manufacturers Warranty

15 years for tank, 2 years for electrical components.

MODEL CE-1500EX

Treatment Unit

Capacity (L)

Sedimentation Chamber	1,114
Anaerobic Filtration Chamber	982
Aerobic Contact Filtration Chamber	580
Storage Chamber	281
Pump Chamber	803
Total Volume	3,265

Dimensions (mm)

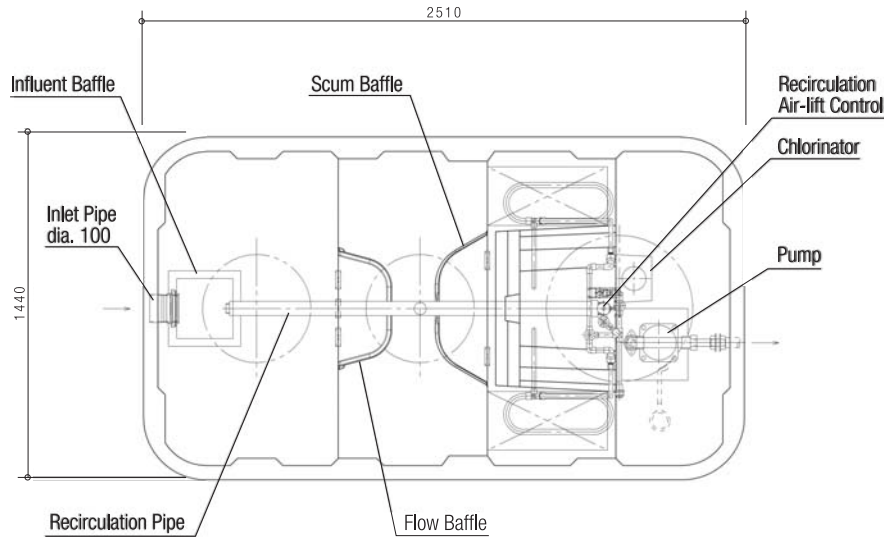

Max. Width	1,440
Max. Length	2,510
Max. Height (Standard)	1,870
Max. Height (with 300mmH risers)	2,170
Inlet Invert (Standard)	460
Inlet Invert (with 300mmH risers)	760
Inlet Pipe Nominal Size	dia. 100
Outlet Pipe Nominal Size	dia. 25

Weight (kg)

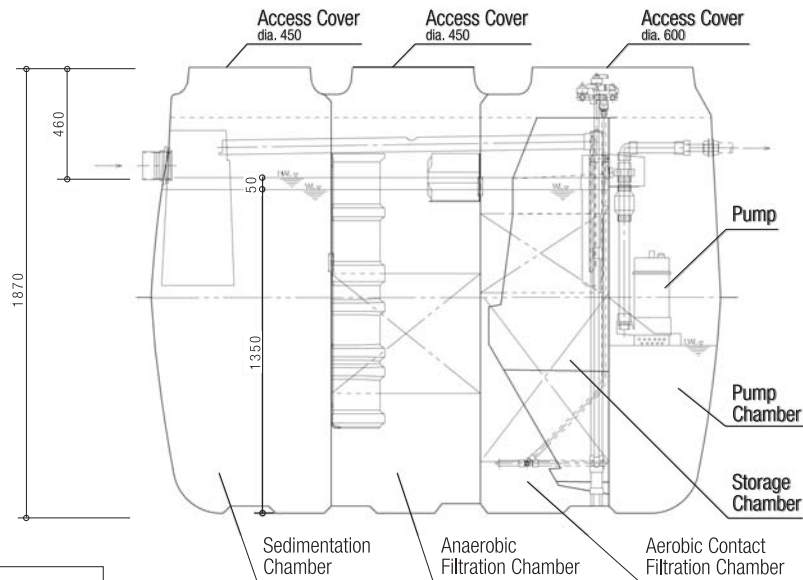

430

Correspondent Blower Type

MAC80N

Horizontal Sectional View

Vertical Sectional View

Dimensions in mm

Fuji Clean Co. Ltd. is certified to the **Quality Management Standard** for the development and manufacture of Jokaso (domestic wastewater treatment system) and provision of maintenance information.
